

Press Release

Khwarizmi Science Society to Host Fifth Annual Lahore Science Mela

Lahore, Pakistan – September 8, 2023 – The Khwarizmi Science Society (KSS) will host the fifth annual Lahore Science Mela (LSM) on October 28 and 29, 2023, at the Crescent Model Higher Secondary School, Shadman, Lahore. The two-day festival is open to all and free of charge.

KSS is a non-profit organization founded in 1997. It aims to further the science culture in Pakistan's educational institutions and the public. The ideology of KSS is "science is for all" and the Society's website is: <https://www.khwarizmi.org>.

The largest public gathering organized by KSS and the most prominent Pakistani citizen science festival is the Lahore Science Mela. Open to all and absolutely free to attend, the festival serves as a temporary science and technology museum. It attracts thousands of visitors from around the country and ignites in them a passion for scientific discovery and invention. The previous LSM in 2022 attracted more than 75,000 visitors in two days and hosted hundreds of national and international science performers. More about this festival series and its impact can be seen here: <https://www.kssism.org>.

This year's LSM is expected to be even bigger and better than previous years. The festival will feature new exhibits, demonstrations, and performances. It will also expand its inclusivity of far-flung schools and participants. Several distinguished international guests, including Mr. Joao Pequeno, the Head of Media Lab at CERN; Professor Dr. Bilge Demirköz from Middle East Technical University (Turkey); and a team of performers from the Konya Science Center, Turkey will also be participating in this year's festival.

Public and private organizations, schools, and individuals form an integral part of this citizen science festival. KSS hosts engaging, innovative, and inspiring collections, experiments, discussions, demonstrations, inventions, workshops and exhibitions.

With an expected lineup of around 200 performers from Pakistan, KSS intends to instill in our citizens an appreciation and curiosity of the world around us. From the Pakistan Atomic Energy Commission to the school-going children, the Lahore Science Mela provides a platform to everyone, regardless of age or background.
